Change Name   About

Sudoku is played on a grid of 9 x 9 spaces. Within the rows and columns are 9 "squares" (made up of 3 x 3 spaces). Each row, column and square (9 spaces each) needs to be filled out with the numbers 1-9, without repeating any numbers within the row, column or square.

The New Game option allows for you to play a randomised game. Enter numbers into the boxes, before checking that your solution is correct. Each day that you complete one puzzle increases your daily streak.
The Solver option allows for you to enter values into an empty puzzle; from which a solution will be produced if possible. Although a single solution will be given, there may be multiple solutions to a puzzle.

Daily Game Streak: 0 Days.
